Subject: Microsoft Settlement

Microsoft is the engine of the modern technology information economy. They have created millions of jobs with their software and development support.

THERE HAS BEEN NO PROOF THAT CONSUMERS HAVE BEEN HARMED. It was never even addressed.

So saying, the court filings and procedures show that Microsoft has acted in ways that are unfair to their competitors (not consumers). The DOJ closing this case was the right thing to do.

You must pressure the hold-out states to settle.
